PROFESSIONAL EXPERIENCE

Sofware Engineer
Clockwork xyz

04/2023 - 10/2023   *USA*

Clockwork is an open-source automation software for the Solana blockchain.

Achievements/Tasks

- Implemented a robust data pipeline using Vector.dev for real-time collection and transformation of Solana blockchain metrics. Streamlined data flow with Vector's VRL for efficient parsing and transformation, integrated with InfluxDB for data storage, and used Grafana for visualizing the data. This pipeline enabled real-time analysis of Solana metrics, improving system performance understanding.
- Created a mobile app that makes automated transactions
- Engineered an off-chain process to monitor smart contract events, triggering updates in the DynamoDB table whenever validators achieved predefined milestones.

Software Engineer
AltLabs - Filmine adoption catalyst

04/2021 - 02/2023   *Belgrade, Serbia*

AltLabs is one of leading blockchain company in Serbia

Achievements/Tasks

- Enhanced software systems to help miners already mining on Filecoin to onboard more deals for storage
- Increased productively with Product Team to understand requirements around Filecoin miners onboarding and improved flows with a scientific approach

Software Engineer
Gradjevinar

06/2020 - 04/2021   *Belgrade, Serbia*

Gradjevinar is a company that developed software for construction companies

Achievements/Tasks

- Implemented Java and React components from ground up for the development of a construction management app

EDUCATION

Computer Science
RAF - Computer Science Faculty

Belgrade,Serbija

SKILLS

`Rust` `GoLang` `JS` `HTML` `CSS` `React.js` `Next.js` `Git` `PostgreSQL` `MySQL` `Solana` `Docker` `Kubernetes` `AWS` `Management`

PROJECTS

Live Ops Manager (11/2023 - 03/2024)

- Live Ops Manager is a tool to manage operations, see them clearly on a timeline. You can test it out on www.liveopsmanager.com
- Developed the product fully in next.js and golang

ArtNova (09/2023 - 11/2023)

- UI for AI-generated tattoos

Grappa (11/2022 - 01/2023)

- Led full discovery and delivery cycle with an engineering team.
- Identified client's pain points in business organization
- Proposed and developed innovated software solution
- Decreased the number of temp workers for business operations

Co-owner of restaurant "Ribar u Beogradu" (2022 - 2023)

- Leading digital operations
- Got the Instagram account from 1300 to 4000 followers in 3 months
- Boosted Google reviews from 20 - 100 with an average grade of 4.9

Software Engineer and Founder of ZaxGroup (2021)

- Creating digital footprints for companies (presentational layer on webflow and digital marketing)
- Creating shops, blogs and custom software for companies
